Control and Cybernetics VOL. 18 (1989) No. 1

## **Editorial**

This journal is edited by the Systems Research Institute of the Polish Academy of Sciences. Its main objective is to stimulate the development of cybernetical and systems sciences through publication of papers by authors from the Institute as well as from Poland and abroad.

The field of interest covers general concepts, theories, methods and techniques associated with control and management in various systems (e.g. technological, economical, ecological, social).

The journal is particulary interested in results in the following areas of research:

Systems and control theory

- General systems theory
- Optimal control and optimization theory
- Optimization algorithms
- Modelling and identification
- Decomposition and coordination methods
- Game theory and polioptimization
- Stochastic and fuzzy systems

Systems control and management

- Systems analysis of national and regional development
- Modelling and control of complex systems (e.g. energy, water, industrial, agriculture)
- Computer aided management and control
- Methodological aspects of applications of control and systems methods We hope that Control and Cybernetics will contribute to the development of systems and control sciences and will stimulate and encourage applications of systems approach in different areas.

## benoutel

This person is edited by the Systemy Research Institute of the Politic Architecture of Sciences In the Society of Politics of Sciences In the Section of Special and Systems of the Section of Section 19 and the Section of Section 19 and Section 19

The field of interest covers peneral entered interest, mathods and legitiniques assumed salm common and matagazing in a commission of the contract of the cont
