

CALL FOR CONTRIBUTIONS

BalticDB' 94

Baltic Workshop on

NATIONAL INFRASTRUCTURE DATABASES:

- Problems, Methods and Experiences.

*

Trakai, Lithuania

17-20 May, 1994

The objective of the workshop is to bring together researchers as well as practitioners in the field of large databases for public administration, serving as vital components in national infrastructure. Particular emphasis will be placed on problems, issues, and opportunities in the Baltic states and in their developing societies and economies. The workshop will address theoretical and methodological as well as usage oriented and political issues related to the technology of data bases and their application. The workshop seeks to gather professionals from the Baltic countries and experts from the rest of the world, to present and discuss their findings and experiences, thereby promoting future contacts and co-operation.

The workshop includes, but is not limited to, the following topics: requirements engineering for database applications; conceptual modelling methods and languages; knowledge databases; database design methods; management of rules in databases; multi-national databases; database communication; database security; modern, public distributed database systems; national information infrastructure development; information management economics; legal aspects of databases and information management; law database systems.

INVITED SPEAKERS
