CONTRIBUTED PAPERS

E. BEDNARCZUK 589  
Sensitivity in mathematical programming: a review

E. CASAS 605  
The Navier–Stokes equations coupled with the heat equation: analysis and control

R. DATKO 621  
Controllable approximations of certain boundary control problems

A. GAŁKA, J.J. TELEGA, W.R. BIELSKI 641  
Contribution to dual variational principles for nonlinear elastic beams

B. GAMBIN 671  
Stochastic homogenization

W. HORN 677  
Mathematical aspects of the Penrose–Fife phase–field model

J. LOVIŠEK 691  
Optimal control in coefficients for parabolic variational inequalities

B.A. MAIR 733  
A cross–validation method for non–parametric estimation

U. RAITUMS	745
The maximum principle and the convexification of optimal control problems	
M. RAO, H. ŠIKIĆ, R. SONG	761
Application of Carleson's Theorem to wavelet inversion	
J.J. TELEGA, T. LEWIŃSKI	773
Mathematical aspects of modelling the macroscopic behaviour of cross-ply laminates with intralaminar cracks	
E. ZUAZUA	793
Approximate controllability for linear parabolic equations with rapidly oscillating coefficients	
 SHORT COMMUNICATIONS	
V. KOVTUNENKO	803
Iteration penalty method for the contact elastoplastic problem	
A. LEONTIEV	809
Existence of a Lagrange multiplier for the control problem of a variational inequality	
 Erratum	 813
