
CONTENTS

Table of contents	193
Special Section on Modeling and Control with Soft Computing	195
Foreword	197
A. BASTIAN	199
Sequential fuzzy system identification	
R.-P. LI, M. MUKAIDONO	225
Fuzzy modelling and clustering neural network	
WAI MAN TSE, KWAN FAI CHEUNG	243
A best-fit based fuzzy forecasting algorithm: principle and formulation	
S. SHI, D.A. BELL	253
An approach to system control based on combination-update of belief	
HUIYANG YANG, YOHSUKE KINOUCI, NOBORU SUGIO	269
Anti-swing fuzzy control of overhead cranes referring a velocity pattern	
J. HINO, K. NANKI, T. YOSHIMURA	283
Semi-active dynamic absorber using fuzzy theory for a beam subjected to a moving load	
S. KAWAJI, K. OGASAWARA & H. HONDA	299
Swing-up control of double pendulum using genetic algorithms	
K. NAKAOKA, T. FURUHASHI, H. MAEDA, Y. UCHIKAWA	315
Finding control knowledge for multiple mobile robots using fuzzy	

classifier systems	
Regular papers	335
L. KUNCHEVA	337
Fuzzy aggregation of multiple classification decisions	
W. HOMENDA	353
Automatic recognition of printed music and its conversion into playable music data	
J. RATYŃSKA, J. WOJUTYŃSKI	369
LISP application for modelling of user's utterance for computer system	
D.A. LAZAR	381
A fuzzy relaxation mechanism for relational dbms querying based on the ordered weighted averaging (OWA) operators	
W. DOBRZYŃSKI	403
A user interface prototype for fuzzy query definition	

**Special Section on
Modeling and
Control with Soft
Computing**
