Preface	427
<b>Inverse Problems</b>	
S. AVDONIN, M. BELISHEV	429
Boundary control and dynamical inverse problem for nonselfadjoint Sturm–Liouville operator (BC–method)	
A. ELAYYAN, V. ISAKOV	441
On identification of a diffusion coefficient	
A.Y. KHAPALOV	451
On unique continuation of solutions of the parabolic equation from a curve	
V. I. MAKSIMOV	465
Some dynamical inverse problems for hyperbolic systems	
<b>Optimal Control</b>	
P. CANNARSA	483
Dynamic programming equation for a class of nonlinear boundary control problems of parabolic type	
M.C. DELFOUR, J.-P. ZOLÉSIO	497
On the design and control of systems governed by differential equations on submanifolds	
K. STYCZEŃ	515
Proper periodic and quasi-periodic control for semi-linear hyperbolic systems	

M.I. SUMIN	529
Suboptimal control of systems with distributed parameters: minimizing sequences, value function, regularity, normality	
R. TRIGGIANI	553
Regularity theory, exact controllability, and optimal quadratic cost problem for spherical shells with physical boundary controls	
<b>Modelling of Physical Problems</b>	
V.A. DANYLENKO, V.A. VLADIMIROV	569
Qualitative and numerical study of the nonequilibrium high-rate processes in relaxing media	
K.-H. HOFFMANN, YONGZHONG HUO	583
On the vibration of an elastic plate embedded with fibers of shape memory alloys: modeling and numerical simulations	
A.M. KHLUDNEV	605
Contact problem for a plate having a crack of minimal opening	
A. MAKARENKO	621
Mathematical modeling of memory effects' influence on fast hydrodynamic and heat conduction processes	
R.E. SHOWALTER, T.D. LITTLE, U. HORNUNG	631
Parabolic PDE with hysteresis	
<b>Discretization and Numerical Solutions</b>	
P. AMODIO, M. PAPRZYCKI	645
On the parallel solution of almost block diagonal systems	
N.V. BANICHUK, F.-J. BARTHOLD, A. FALK, E. STEIN	657
Finite element analysis with mesh refinement for shape optimization	
M. FALCONE, R. ROSACE	665
Discrete-time approximation of optimal control problems for delayed equations
