
CONTENTS

Table of contents	679
S. LAHIRI	681
Representation of bargaining games as simple distribution problems	
R.V.V. VIDAL	685
Stochastic version of the economic lot size model	
S.T. WIERZCHOŃ	693
Uncertain dynamical systems with fuzzy constraints	
P. KULCZYCKI	707
Time-optimal stabilization of a discontinuous and non-autonomous dynamic object	
A. JOURANI	721
Subdifferentiability and subdifferential monotonicity	
J. GONDZIO	739
Another simplex-type method for large scale linear programming	
A. ALTMAN	761
Higher order primal-dual interior point method for separable convex quadratic optimization	
P. SALANI	773
Dispersion of a radioactive tracer in the blood flow	
L. KAWEŃCKI, T. NIEWIEROWICZ	789
Electric energy losses minimization in induction motor speed control taking into consideration the electromagnetic transients	

V. KOVTUNENKO	801
Analytical solution of a variational inequality for a cutted bar	
N.E. MASTORAKIS	809
Approximate multidimensional polynomial factorization into general $m - D$ polynomial factors	
N.E. MASTORAKIS	821
An extension to the sampling theorem for lowpass bandlimited periodic time functions using n th-order derivatives
