

Alphabetical list of contributors of volume 24 (1995)

AUTHOR, Title, Issue number, pages

- P. ANGELOV, An analytical method for solving a type of fuzzy optimization problems, 3, 363-373.
- T. BANEK, A monotone follower problem, 1, 41-45.
- G.J. BLINOWSKI, Petri net model of a mobile robot, 1, 47-75.
- W. BRZOZOWSKI, A methodology for optimizing managerial exploitation decisions in an industrial enterprise on the example of a power plant, 3, 327-347.
- M. BUSŁOWICZ, Computational methods for robust stability analysis of a class of quasi-polynomials, 2, 129-139.
- J.S. CHIPMAN & P. WINKER, Optimal industrial classification by threshold accepting, 4, 477-494.
- K. CICHOCKI, I. WORONIECKA, Inflationary effects of administrative price increases, 3, 285-299.
- A. DEBIŃSKA-NAGÓRSKA, A. JUST, Z. STEMPIEŃ, Approximation of some optimization problems for systems governed by nonlinear parabolic equation, 1, 29-40.
- T. GAFNER, Dynamic Programming: A valuable algorithm for optimization approaches in clustering?, 4, 495-503.
- G. GAMBARELLI, Survival game: n -person bargaining for controlling coalition, 3, 243-256.
- G. GOVAERT, Simultaneous clustering of rows and columns, 4, 437-458.
- H. GÓRECKI, M. ZACZYK, A method for calculation of generalized integral criterion
 $\int_0^{\infty} \epsilon^{2k}(t) dt, k = 1, 2, \dots$
for control systems with time-delay, 2, 223-231.
- K. JAJUGA, Optimization in fuzzy clustering, 4, 409-419.
- T.Y. JOKKA, On the q -superlinear convergence of Newton's method for solving nonsmooth equations, 2, 171-183.
- L. JÓDAR, E. PONSODA, R. COMPANY, Solutions of coupled Riccati equations arising in differential games, 2, 117-128.
- M.J. HOLLER, X. LI, From public good index to public value. An axiomatic approach and generalization, 3, 257-270.
- J. KARPIŃSKI, D. GAȚAREK, A method of reliability analysis of complex

equipment, 2, 185-198.

P. KADŁUCZKA, K. WALA, Tabu search and genetic algorithms for the generalized graph partitioning problem, 4, 459-476.

G.E. KERSTEN, S. SZPAKOWICZ, Forming decision-making skills with a patient simulator, 3, 301-326.

YU. KHARIN, E. ZHUK, Optimal clustering under dependence of class numbers, 4, 399-408.

A.M. KHLUDNEV, On contact problem for a plate having a crack, 3, 349-361.

E. KOVÁCS, A. SUGÁR, Multidimensional scaling for comparison of dendrograms, 4, 513-532.

W. KWASOWIEC, A general view on fuzzy relational database systems and querying, 3, 375-386.

S. LAHIRI, Fixed price equilibria in distribution economies, 3, 271-284.

PH. LEHERT, CH. DUMORTIER, Critical percolation properties to prove existence of $O(n)$ expected time single linkage clustering algorithm at a predetermined threshold, 4, 505-512.

N.E. MASTORAKIS, S.G. TZAFESTAS, N.J. THEODOROU, m -D characteristic polynomial factorization using operators' method and state feedback control, 2, 141-153.

S. MIYAMOTO, Y. AGUSTA, An efficient algorithm for ℓ_1 fuzzy c -means and its termination, 4, 421-436.

J.W. OWSIŃSKI, Clustering - modelling, capacities, limits, applications, 4, 391-397.

YU.S. POPKOV, Multiplicative algorithms for finding nonnegative solution of convex programming problems, 2, 155-169.

Z. SURAJ, PN-tools: environment for the design and analysis of Petri nets, 2, 199-222.

S. TRYBUŁA, A noisy duel with two kinds of weapons, 1, 77-102.

Y. UEMURA, A normal possibility decision rule, 1, 103-111.

Y. UEMURA, The limit of using probability of a fuzzy event in a fuzzy decision problem, 2, 233-238.

H. WYSOCKI, Optimal control of a generalized linear dynamic system with quadratic index of performance, 1, 9-28.
