Table of contents	3
A. KAPLAN and R. TICHATSCHKE: Regularized penalty method for non-coercive parabolic optimal control problems	5
I. CHRYSOVERGHI, A. BACOPOULOS, J. COLETOS, B. KOKKINIS: Discrete approximation of nonconvex hyperbolic optimal control problems with state constraints	29
M. STUDNIARSKI: Necessary optimality conditions for nonsmooth two-dimensional control systems described by Roesser's model	51
K. SZAJOWSKI and W.L. DE KONING: Discrete-time Markovian jump linear systems	63
HUA XU, KOICHI MIZUKAMI and MICHIIHIKO KOBARA: Memoryless equilibrium strategies in multilevel decision processes of discrete-time descriptor systems	81
J. PELCZEWSKI: Legendre polynomials method in time-optimal control of linear single-input systems	105
JUN SONG, XIAOMING XU, XING HE: A stability based neural networks controller design method	119
L.S. ZAREMBA: Construction of a $k$ - immunization strategy with the highest convexity	135
