Control and Cybernetics

vol. **30** (2001) No. 3

CONTENTS

S. VOLKWEIN: 249
Second-order conditions for boundary control problems of the Burgers equation

A. HABBAL: 279
Boundary layer homogenization for periodic oscillating boundaries

T. ROUBÍČEK, W.H. SCHMIDT: 303
Existence in optimal control problems of certain Fredholm integral equations

S. ROLEWICZ: 323
On uniformly approximate convex and strongly $\alpha(\cdot)$-paraconvex functions

L. WANG, L. ZHANG, Z.Z. WANG: 331
Robust stability of a family of matrices

K. BOBECKA, E.Z. FERENSTEIN: 339
On nonzero-sum stopping game related to discrete risk processes

E. KORCZAK: 355
Upper bounds on the integrated tail of the reliability function, with Applications

Book reviews

P. Kulczycki: 367
Optimal Control: An Introduction (by A. Locatelli)

J.J. Telega: 371
Lyapunov-Based Control of Mechanical Systems (by M.S. de Queiroz, D.M. Dawson, S.P. Nagarkatt and F. Zhang)

J. Klamka: 375
Advances in Mathematical Systems Theory (by F. Colonius, U. Helmke, D. Prätzel-Wolters and F. Wirth, Eds.)
