CONTENTS

---

M.I. SUMIN:	449
Optimal control of semilinear elliptic equation with state constraint: maximum principle for minimizing sequence, regularity, normality, sensitivity	
M. PIERRE, J. VANCOSTENOBLE:	473
Strong decay for one-dimensional wave equations with nonmonotone boundary damping	
K. EPPLER:	485
Second derivatives and sufficient optimality conditions for shape functionals	
K. OHTSUKA, A. KHLUDNEV:	513
Generalized J-integral method for sensitivity analysis of static shape design	
J.-R. CLERMONT, M. NORMANDIN, D. RADU:	535
Some remarks on the concept of stream tubes for numerical simulations of complex fluid flows — applications	
J.M. CALVIN, A. ŽILINSKAS:	555
On the choice of statistical model for one-dimensional P-algorithms	
C.S. TZAFESTAS, P.A. PROKOPIOU, S.G. TZAFESTAS:	567
A differential motion planning algorithm for controlling multi-robot systems handling a common object	
A. BARTOSZEWICZ:	585
Chattering attenuation in sliding mode control systems	

---

M. BERTOCCHI, J. DUPAČOVÁ, V. MORIGGIA:	595
Sensitivity analysis of a bond portfolio model for the Italian market	
T. BANEK, P. KOWALIK, E. KOZŁOWSKI:	617
Numerical simulations of a portfolio selection model with information cost	
<i>Book reviews</i>	
Z. Nahorski:	623
Compartmental Modelling with Networks (by G.G. Walter and M. Contreras)
