
CONTENTS

C. MOROȘANU:	5
Boundary optimal control problem for the phase-field transition system using fractional steps method	
J. F. BONNANS, P. CHARTIER, H. ZIDANI:	33
Discrete approximations of the Hamilton-Jacobi equation for an optimal control problem of a differential-algebraic system	
W. KRABS, S. PICKL:	57
Controllability of a time-discrete dynamical system with the aid of the solution of an approximation problem	
T. KACZOREK:	75
Holdability and stabilizability of 2D Roesser model	
T. BANEK, E. KOZŁOWSKI:	87
On an operational model of single investment selection with information cost	
A. WISZNIEWSKA-MATYSZKIEL:	103
Static and dynamic equilibria in stochastic games with continuum of players	
S.-B. YIM, J.-H. OH:	127
A novel approach for the optimal control of autonomous underwater vehicles	
A. SWIERNIAK, A. POLANSKI, J. ŚMIEJA, M. KIMMEL, J. RZESZOWSKA-WOLNY:	147
Asymptotic analysis of three random branching walk models arising in molecular biology	

M. EKES:	163
General elections modelled with infinitely many voters	
B. JANKOWSKA:	175
Yet another object-oriented data model and its application
