Control and Cybernetics

vol. **32** (2003) No. 3

CONTENTS

Preface to the Special Issue 447

W. ALT: 451
Approximation of optimal control problems with bound constraints by control parameterization

G. AVALOS, I. LASIECKA: 473
Mechanical and thermal null controllability of thermoelastic plates and singularity of the associated mimimal energy function

E. M. BEDNARCZUK: 491
Order-Lipschitzian properties of multifunctions with applications to stability of efficient points

M. DAMBRINE, J. SOKOŁOWSKI, A. ŻOCHOWSKI: 503
On stability analysis in shape optimisation

A. L. DONTCHEV: 529
Robinson's implicit function theorem

A. D. IOFFE: 543
On robustness of the regularity property of maps

H. MAURER, N. P. OSMOLOVSKII: 555
Second order conditions

B. S. MORDUKHOVICH, L. WANG: 585
Optimal control of constrained delay-differential inclusions with multivalued initial conditions

A. MYŚLIŃSKI: 611
Shape optimization of thermoviscoelastic contact problems

I. PAWŁOW, W. M. ZAJĄCZKOWSKI: 629
On diffused-interface models of shape memory alloys

M. PREISS, J. STOER: 659
Methods for solving semidefinite linear complementarity problems

S. ROLEWICZ: 671
On σ-porous and Φ-angle-small sets in metric spaces

T. ROUBIČEK, F. TRÖLTZSCH: 683
Lipschitz stability of optimal controls for the steady-state Navier-Stokes equations
