Preface	611
J. ALLWRIGHT, R. VINTER: Second order conditions for periodic optimal control problems	617
Z. ARTSTEIN: Bang-bang controls in the singular perturbations limit	645
V. BARBU, L. LASIECKA, M.A. RAMMAHA: Existence and uniqueness of solutions to wave equations with nonlinear degenerate damping and source terms	665
A. CAETANO, A. SARYCHEV, D. SEABRA: Two-dimensional stable Lavrentiev phenomenon with and without boundary conditions	689
F. CLARKE: The maximum principle in optimal control, then and now	709
A.V. DMITRUK: On a nonlocal metric regularity of nonlinear operators	723
L. DRUŹKOWSKI: On the global asymptotic stability problem and the Jacobian conjecture	747
U. FELGENHAUER: Optimality properties of controls with bang-bang components in problems with semilinear state equation	763
H. FRANKOWSKA: Optimal synthesis via superdifferentials of value function	787

---

A. IOFFE:	805
On necessary conditions in variable end-time optimal control problems	
B. JAKUBCZYK, W. RESPONDEK:	819
Phase portraits of planar control-affine systems	
B. MORDUKHOVICH, D. WANG:	849
Optimal control of semilinear evolution inclusions via discrete approximations	
K. NACHI, J.-P. PENOT:	871
Inversion of multifunctions and differential inclusions	
S.A. NAZAROV, J. SOKOŁOWSKI:	903
Self-adjoint extensions of differential operators and exterior topological derivatives in shape optimization	
N.P. OSMOLOVSKII, H. MAURER:	927
Equivalence of second order optimality conditions for bang–bang control problems. Part 1: Main results	
S. ROLEWICZ:	951
Paraconvex analysis	
V.V. VELIOV:	967
Error analysis of discrete approximations to bang-bang optimal control problems: the linear case
