Control and Cybernetics

vol. **34** (2005) No. 3

CONTENTS

Preface 611

J. ALLWRIGHT, R. VINTER: 617
Second order conditions for periodic optimal control problems

Z. ARTSTEIN: 645
Bang-bang controls in the singular perturbations limit

V. BARBU, L. LASIECKA, M.A. RAMMAHA: 665
Existence and uniqueness of solutions to wave equations with nonlinear degenerate damping and source terms

A. CAETANO, A. SARYCHEV, D. SEABRA: 689
Two-dimensional stable Lavrentiev phenomenon with and without boundary conditions

F. CLARKE: 709
The maximum principle in optimal control, then and now

A.V. DMITRUK: 723
On a nonlocal metric regularity of nonlinear operators

L. DRUŻKOWSKI: 747
On the global asymptotic stability problem and the Jacobian conjecture

U. FELGENHAUER: 763
Optimality properties of controls with bang-bang components in problems with semilinear state equation

H. FRANKOWSKA: 787
Optimal synthesis via superdifferentials of value function

A. IOFFE: 805
On necessary conditions in variable end-time optimal control problems

B. JAKUBCZYK, W. RESPONDEK: 819
Phase portraits of planar control-affine systems

B. MORDUKHOVICH, D. WANG: 849
Optimal control of semilinear evolution inclusions via discrete approximations

K. NACHI, J.-P. PENOT: 871
Inversion of multifunctions and differential inclusions

S.A. NAZAROV, J. SOKOŁOWSKI: 903
Self-adjoint extensions of differential operators and exterior topological derivatives in shape optimization

N.P. OSMOLOVSKII, H. MAURER: 927
Equivalence of second order optimality conditions for bang–bang control problems. Part 1: Main results

S. ROLEWICZ: 951
Paraconvex analysis

V.V. VELIOV: 967
Error analysis of discrete approximations to bang-bang optimal control problems: the linear case
