## Issue 1: Special Issue on Techniques of Advanced Data Processing and Analysis. Guest Edited by: Marcin Gorawski, Tadeusz Morzy and Robert Wrembel

Guest Editors' Introduction, 5–8.

S. GRECO, R. SŁOWIŃSKI and I. SZCZĘCH: Analysis of monotonicity properties of some rule interestingness measures, 9–25.

J. STEFANOWSKI and R. ZIEMBIŃSKI: An experimental evaluation of two approaches to mining context based sequential patterns, 27–45.

P. GRUDZIŃSKI and M. WOJCIECHOWSKI: Integration of candidate hash trees in concurrent processing of frequent itemset queries using Apriori, 47–65.

P. KAZIENKO, K. MUSIAŁ and A. ZGRZYWA: Evaluation of node position based on email communication, 67–86.

M. MORZY, A. WIERZBICKI and A.N. PAPADOPOULOS: Mining online auction social networks for reputation and recommendation, 87–106.

W. ANDRZEJEWSKI, Z. KRÓLIKOWSKI and T. MORZY: How to improve efficiency of analysis of sequential data? 107–126.

M. MASEWICZ, W. ANDRZEJEWSKI, R. WREMBEL and Z. KRÓLIKOWSKI: Predicting access to materialized methods by means of hidden Markov model, 127–152.

M. GORAWSKI: Time complexity of page filling algorithms in Materialized Aggregate List (MAL) and MAL/TRIGG materialization cost, 153–172.

T. PANKOWSKI: Schema mapping and query reformulation in peer-to-peer XML data integration system, 173–192.

M. FALKOWSKI and C. JEŃDRZEJEK: An efficient SQL-based querying method to RDF schemata, 193–213.

K. JANKIEWICZ: SXCCP+: Simple XML Concurrency Control Protocol for XML Database Systems, 215–237.

I. NTOUTSI, M. SPILIOPOULOU and Y. THEODORIDIS: Tracing cluster transitions for different cluster types, 239–259.

L. ROKACH and L. NAAMANI: Active learning using pessimistic expectation estimators, 261–280.

P. BIAŁOŃ: A linear Support Vector Machine solver for a large number of training examples, 281–300.

**Issue 2: Special Issue on Fuzzy Logic and Soft Computing in Processing of Imperfect Information. Guest Edited by: Guy De Tré and Sławomir Zadrozny**

G. DE TRÉ and S. ZADROŻNY: Guest Editorial: Fuzzy logic and soft computing in an effective and efficient processing of imperfect information—in memoriam Ashley Morris, 305–307.

G. DE TRÉ and S. ZADROŻNY: In Memoriam: Ashley Morris (1963-2008), 309–310.

A. GONZÁLEZ, N. MARÍN, O. PONS and M.A. VILA: Fuzzy certainty on fuzzy values, 311–339.

A. BRONSELAER, A. HALLEZ and G. DE TRÉ: A possibilistic view on set and multiset comparison, 341–366.

Q. WEI, G. CHEN and X. ZHOU: Properties and pre-processing strategies to enhance the discovery of functional dependency with degree of satisfaction, 367–394.

L. LIETARD and D. ROCACHER: Conditions with aggregates evaluated using gradual numbers, 395–417.

R.A. ANGRYK: Attribute-oriented defuzzification of fuzzy database tuples with categorical entries, 419–453.

D. ORTIZ-ARROYO and H.U. CHRISTENSEN: An optimized soft computing-based passage retrieval system, 455–479.

M. WALLACE: Ontologies and soft computing in flexible querying, 481–507.

J. VERSTRAETE: Fuzzy regions: interpretations of surface area and distance, 509–526.

*Regular Papers*

T. KACZOREK and P. PRZYBOROWSKI: Reachability, controllability to zero and observability of the positive discrete-time Lyapunov systems, 529–541.

W. KRAJEWSKI and U. VIARO: Iterative-interpolation algorithms for  $L_2$  model reduction, 543–554.

K. KHAZAFI, N. RUEDA and P. ENFLO: Multiobjective variational programming under generalized  $(V, \rho)$ - $B$ -type I functions, 555–572.

**Issue 3:**

M. HINZE and U. MATTHES: A note on variational discretization of elliptic Neumann boundary control, 577–591.

- M. SUN and Y. JIA: Persistent bounded disturbance rejection for uncertain time-delay systems, 593–607.
- W.P. HUNEK and K.J. LATAWIEC: Minimum variance control of discrete-time and continuous-time LTI MIMO systems – a new unified framework, 609–624.
- Y.H. HACI and K. ÖZEN: Terminal control problem for processes represented by nonlinear multi parameter binary dynamic system, 625–633.
- M. ZAREINEJAD, S.M. REZAEI, S.S. GHIDARY, A. ABDULLAH and M. MOTAMEDI: Robust impedance control of a piezoelectric stage under thermal and external load disturbances, 635–648.
- A. DAHIMENE, A. AZRAR and M. NOUREDDINE: Incomplete matrix partial fraction expansion, 649–654.
- J. TABOR and J. TABOR: Generalized approximate midconvexity, 655–669.
- M. LIBURA: On the robustness of optimal solutions for combinatorial optimization problems, 671–685.
- Y. WANG and P. FEI: A primal-infeasible interior point algorithm for linearly constrained convex programming, 687–704.
- J. POMYKAŁA and T. TRABSZYS: Anonymous signer verifiable encrypted signature from bilinear pairing, 705–712.
- M. KUBALE and K.M. OCETKIEWICZ: A new optimal algorithm for a time-dependent scheduling problem, 713–721.
- E. FIGIELSKA: Heuristic algorithms for preemptive scheduling in a two-stage flowshop with unrelated parallel machines and 0-1 resource requirements, 723–743.
- A.P. TERESO, R.A. NOVAIS, M.M.T. ARAÚJO and S.E. ELMAGHRABY: Optimal resource allocation in stochastic activity networks via the electromagnetism approach: a platform implementation in Java, 745–782.
- G. GRABOWSKA and M. WIECH: Grade analysis of data from the European Economic Survey 2005 on Economic Climate in Polish Servicing Sector, 783–810.
- N. NIKOLOVA: Empirical justification of the uncertain equivalence method, 811–834.
- N. NIKOLOVA, K. TENEKEDJIEV, F. DONG and K. HIROTA: Comparison of linear interpolation and arctan approximation of one-dimensional monotonic utility functions based on experimental data, 835–861.
- W.M. HUNG and W.CH. HONG: Application of SVR with improved ant colony optimization algorithms in exchange rate forecasting, 863–891.
- J. GADOMSKI: Dynamics of loans in the Polish banking system, 893–911.

**Issue 4: Special Issue: 50 Years of Optimal Control. Guest Edited by: Alexander Ioffe, Kazimierz Malanowski and Fredi Tröltzsch Part A (4A/2009)**

Preface, 915.

*Historical Surveys*

A.V. DMITRUK: On the development of Pontryagin's Maximum Principle in the works of A. Ya. Dubovitskii and A. A. Milyutin, 923–957.

R.V. GAMKRELIDZE: Hamiltonian form of the maximum principle, 959–971.

H.J. PESCH and M. PLAIL: The Maximum Principle of optimal control: A history of ingenious ideas and missed opportunities, 973–995.

V. M. TIKHOMIROV, V. B. DEMIDOVITCH: A few words about history of extremal problems at Moscow University, 997–1013.

*Regular papers*

Z. ARTSTEIN: Pontryagin Maximum Principle for coupled slow and fast systems, 1003–1019.

J.F. BONNANS and A. HERMANT: Revisiting the analysis of optimal control problems with several state constraints, 1021–1052.

B. BONNARD and D. SUGNY: Geometric optimal control and two-level dissipative quantum systems, 1053–1080.

A. BRESSAN: From optimal control to non-cooperative differential games: a homotopy approach, 1081–1106.

G. BUTTAZZO, E. MAININI and E. STEPANOV: Stationary configurations for the average distance functional and related problems, 1107–1130.

E. CASAS: Exact penalization of pointwise constraints for optimal control problems, 1131–1150.

F. CLARKE and M. DO R. DE PINHO: The nonsmooth maximum principle, 1151–1167.

F. CLARKE and R.B. VINTER: Stability analysis of sliding-mode feedback control, 1169–1192.

L. CONSIGLIERI, Š. NEČASOVÁ and J. SOKOLOWSKI: Incompressible Maxwell-Boussinesq approximation: Existence, uniqueness and shape sensitivity, 1193–1215.

J.C. DE LOS REYES and K. KUNISCH: Optimal control of partial differential equations with affine control constraints, 1217–1249.

T. DONCHEV and E. FARKHI: On the theorem of Filippov–Pliś and some applications, 1251–1272.

**Part B (4B/2009)**

Preface, 1275.

*Regular papers continued*

A.L. DONTCHEV and V.M. VELIOV: Metric regularity under approximations, 1283–1303.

U. FELGENHAUER, L. POGGIOLINI and G. STEFANI: Optimality and stability result for bang–bang optimal controls with simple and double switch behaviour, 1305–1325.

H. FRANKOWSKA: Normality of the maximum principle for absolutely continuous solutions to Bolza problems under state constraints, 1327–1340.

V. GURMAN: Degeneracy and generalized solutions of optimal control problems, 1341–1358.

A. HALANAY and D. TIBA: Shape optimization for stationary Navier-Stokes equations, 1359–1374.

B. JAKUBCZYK: Curvatures of single-input control systems, 1375–1391.

S. KESAVAN and J.-P. RAYMOND: On a degenerate Riccati equation, 1393–1410.

M. KRASTANOV: High-order variations and small-time local attainability, 1411–1427.

I. LASIECKA and A. TUFFAHA: A Bolza optimal synthesis problem for singular estimate control systems, 1429–1460.

C. LEBIEDZIK and R. TRIGGIANI: Optimal regularity and optimal control of a thermoelastic structural acoustic model with point control and clamped boundary conditions, 1461–1499.

U. LEDZEWICZ and H. SCHÄTTLER: Singular controls and chattering arcs in optimal control problems arising in biomedicine, 1501–1523.

C. NOUR, R.J. STERN and J. TAKCHE: The union of uniform closed balls conjecture, 1525–1534.

N.P. OSMOLOVSKII: Second order conditions in optimal control problems with mixed equality-type constraints on a variable time interval, 1535–1556.

J.V. OUTRATA and M. ČERVINKA: On the implicit programming approach in a class of mathematical programs with equilibrium constraints, 1557–1574.

R.T. ROCKAFELLAR: Hamiltonian trajectories and saddle points in mathematical economics, 1575–1588.

V. TIKHOMIROV: Lagrange principle and necessary conditions, 1589–1605.

A.J. ZASLAVSKI: Convergence of approximate solutions of variational problems, 1607–1629.

J.P. ZOLÉSIO: Variational formulation for incompressible Euler flow/ shape-morphing metric and geodesic, 1631–1653.
