Control and Cybernetics

vol. **38** (2009) No. 4

Alphabetical list of contributors of volume 38 (2009)
FIRST AUTHOR, title, issue number, pages

W. ANDRZEJEWSKI, Z. KRÓLIKOWSKI and T. MORZY: How to improve efficiency of analysis of sequential data? 1, 107–126.

R.A. ANGRYK: Attribute-oriented defuzzification of fuzzy database tuples with categorical entries, 2, 419–453.

Z. ARTSTEIN: Pontryagin Maximum Principle for coupled slow and fast systems, 4A, 1017–1033.

M. FALKOWSKI and C. JĘDRZEJEK: An efficient SQL-based querying method to RDF schemata, 1, 193–213.

P. BIAŁOŃ: A linear Support Vector Machine solver for a large number of training examples, 1, 281–300.

J.F. BONNANS and A. HERMANT: Revisiting the analysis of optimal control problems with several state constraints, 4A, 1035–1066.

B. BONNARD and D. SUGNY: Geometric optimal control and two-level dissipative quantum systems, 4A, 1067–1094.

A. BRONSELAER, A. HALLEZ and G. DE TRÉ: A possibilistic view on set and multiset comparison, 2, 341–366.

A. BRESSAN: From optimal control to non-cooperative differential games: a homotopy approach, 4A, 1095–1120.

G. BUTTAZZO, E. MAININI and E. STEPANOV: Stationary configurations for the average distance functional and related problems, 4A, 1121–1144.

E. CASAS: Exact penalization of pointwise constraints for optimal control problems, 4A, 1145–1164.

F. CLARKE and M. DO R. DE PINHO: The nonsmooth maximum principle, 4A, 1165–1181.

F. CLARKE and R.B. VINTER: Stability analysis of sliding-mode feedback control, 4A, 1183–1206.

L. CONSIGLIERI, Š. NEČASOVÁ and J. SOKOLOWSKI: Incompressible Maxwell-Boussinesq approximation: Existence, uniqueness and shape sensitivity, 4A, 1207–1229.

A. DAHIMENE, A. AZRAR and M. NOUREDDINE: Incomplete matrix partial fraction expansion, 3, 649–654.

J.C. DE LOS REYES and K. KUNISCH: Optimal control of partial differential equations with affine control constraints, 4A, 1231–1263.

A.V. DMITRUK: On the development of Pontryagin's Maximum Principle in the works of A. Ya. Dubovitskii and A. A. Milyutin, 4A, 923–957.

T. DONCHEV and E. FARKHI: On the theorem of Filippov–Pliś and some applications, 4A, 1265–1286.

A.L. DONTCHEV and V.M. VELIOV: Metric regularity under approximations, 4B, 1283–1303.

U. FELGENHAUER, L. POGGIOLINI and G. STEFANI: Optimality and stability result for bang–bang optimal controls with simple and double switch behaviour, 4B, 1305–1325.

E. FIGIELSKA: Heuristic algorithms for preemptive scheduling in a two-stage flowshop with unrelated parallel machines and 0-1 resource requirements, 3, 723–743.

H. FRANKOWSKA: Normality of the maximum principle for absolutely continuous solutions to Bolza problems under state constraints, 4B, 1327–1340.

J. GADOMSKI: Dynamics of loans in the Polish banking system, 3, 893–911.

R.V. GAMKRELIDZE: Hamiltonian form of the maximum principle, 4A, 959–971.

A. GONZÁLEZ, N. MARÍN, O. PONS and M.A. VILA: Fuzzy certainty on fuzzy values, 2, 311-339.

M. GORAWSKI: Time complexity of page filling algorithms in Materialized Aggregate List (MAL) and MAL/TRIGG materialization cost, 1, 153–172.

G. GRABOWSKA and M. WIECH: Grade analysis of data from the European Economic Survey 2005 on Economic Climate in Polish Servicing Sector, 3, 783–810.

S. GRECO, R. SŁOWIŃSKI and I. SZCZĘCH: Analysis of monotonicity properties of some rule interestingness measures, 1, 9–25.

P. GRUDZIŃSKI and M. WOJCIECHOWSKI: Integration of candidate hash trees in concurrent processing of frequent itemset queries using Apriori, 1, 47–65.

V. GURMAN: Degeneracy and generalized solutions of optimal control problems, 4B, 1341–1358.

Y.H. HACI and K. ÖZEN: Terminal control problem for processes represented by nonlinear multi parameter binary dynamic system, 3, 625–633.

A. HALANAY and D. TIBA: Shape optimization for stationary Navier-Stokes equations, 4B, 1359–1374.

M. HINZE and U. MATTHES: A note on variational discretization of elliptic Neumann boundary control, 3, 577–591.

W.P. HUNEK and K.J. LATAWIEC: Minimum variance control of discrete-time and continuous-time LTI MIMO systems – a new unified framework, 3, 609–624.

W.M. HUNG and W.CH. HONG: Application of SVR with improved ant colony optimization algorithms in exchange rate forecasting, 3, 863–891.

B. JAKUBCZYK: Curvatures of single-input control systems, 4B, 1375-1391.

K. JANKIEWICZ: SXCCP+: Simple XML Concurrency Control Protocol for XML Database Systems, 1, 215–237.

T. KACZOREK and P. PRZYBOROWSKI: Reachability, controllability to zero and observability of the positive discrete-time Lyapunov systems, 2, 529–541.

P. KAZIENKO, K. MUSIAŁ and A. ZGRZYWA: Evaluation of node position based on email communication, 1, 67–86.

S. KESAVAN and J.-P. RAYMOND: On a degenerate Riccati equation, 4B, 1393–1410.

K. KHAZAFI, N. RUEDA and P. ENFLO: Multiobjective variational programming under generalized (V, ρ)-B-type I functions, 2, 555–572.

W. KRAJEWSKI and U. VIARO: Iterative-interpolation algorithms for L_2 model reduction, 2, 543–554.

M. KRASTANOV: High-order variations and small-time local attainability, 4B, 1411-1427.

M. KUBALE and K.M. OCETKIEWICZ: A new optimal algorithm for a time-dependent scheduling problem, 3, 713-721.

M. MASEWICZ, W. ANDRZEJEWSKI, R. WREMBEL and Z. KRÓLIKOWSKI: Predicting access to materialized methods by means of hidden Markov model, 1, 127–152.

I. LASIECKA and A. TUFFAHA: A Bolza optimal synthesis problem for singular estimate control systems, 4B, 1429–1460.

C. LEBIEDZIK and R. TRIGGIANI: Optimal regularity and optimal control of a thermoelastic structural acoustic model with point control and clamped boundary conditions, 4B, 1461–1499.

U. LEDZEWICZ and H. SCHÄTTLER: Singular controls and chattering arcs in optimal control problems arising in biomedicine, 4B, 1501–1523.

M. LIBURA: On the robustness of optimal solutions for combinatorial optimization problems, 3, 671–685.

L. LIETARD and D. ROCACHER: Conditions with aggregates evaluated using gradual numbers, 2, 395–417.

M. MORZY, A. WIERZBICKI and A.N. PAPADOPOULOS: Mining online auction social networks for reputation and recommendation, 1, 87–106.

N. NIKOLOVA: Empirical justification of the uncertain equivalence method, 3, 811–834.

N. NIKOLOVA, K. TENEKEDJIEV, F. DONG and K. HIROTA: Comparison of linear interpolation and arctan approximation of one-dimensional monotonic utility functions based on experimental data, 3, 835–861.

C. NOUR, R.J. STERN and J. TAKCHE: The union of uniform closed balls conjecture, 4B, 1525–1534.

I. NTOUTSI, M. SPILIOPOULOU and Y. THEODORIDIS: Tracing cluster transitions for different cluster types, 1, 239–259.

D. ORTIZ-ARROYO and H.U. CHRISTENSEN: An optimized soft computing-based passage retrieval system, 2, 455–479.

N.P. OSMOLOVSKII: Second order conditions in optimal control problems with mixed equality-type constraints on a variable time interval, 4B, 1535-1556.

J.V. OUTRATA and M. ČERVINKA: On the implicit programming approach in a class of mathematical programs with equilibrium constraints, 4B, 1557-1574.

T. PANKOWSKI: Schema mapping and query reformulation in peer-to-peer XML data integration system, 1, 173–192.

H.J. PESCH and M. PLAIL: The Maximum Principle of optimal control: A history of ingenious ideas and missed opportunities, 4A, 973–995.

J. POMYKAŁA and T. TRABSZYS: Anonymous signer verifiable encrypted signature from bilinear pairing, 3, 705–712.

R. T. ROCKAFELLAR: Hamiltonian trajectories and saddle points in mathematical economics, 4B, 1575–1588.

L. ROKACH and L. NAAMANI: Active learning using pessimistic expectation estimators, 1, 261–280.

J. STEFANOWSKI and R. ZIEMBIŃSKI: An experimental evaluation of two approaches to mining context based sequential patterns, 1, 27–45.

M. SUN and Y. JIA: Persistent bounded disturbance rejection for uncertain time-delay systems, 3, 593–607.

J. TABOR and J. TABOR: Generalized approximate midconvexity, 3, 655–669.

A.P. TERESO, R.A. NOVAIS, M.M.T. ARAÚJO and S.E. ELMAGHRABY: Optimal resource allocation in stochastic activity networks via the electromagnetism approach: a platform implementation in Java, 3, 745–782.

V. TIKHOMIROV: Lagrange principle and necessary conditions, 4A, 1589–1605.

V. M. TIKHOMIROV, V. B. DEMIDOVITCH: A few words about history of extremal problems at Moscow University, 4B, 997–1013.

M. WALLACE: Ontologies and soft computing in flexible querying, 2, 481–507.

Y. WANG and P. FEI: A primal-infeasible interior point algorithm for linearly constrained convex programming, 3, 687–704.

Q. WEI, G. CHEN and X. ZHOU: Properties and pre-processing strategies to enhance the discovery of functional dependency with degree of satisfaction, 2, 367–394.

J. VERSTRAETE: Fuzzy regions: interpretations of surface area and distance, 2, 509–526.

M. ZAREINEJAD, S.M. REZAEI, S.S. GHIDARY, A. ABDULLAH and M. MOTAMEDI: Robust impedance control of a piezoelectric stage under thermal and external load disturbances, 3, 635–648.

A.J. ZASLAVSKI: Convergence of approximate solutions of variational problems, 4B, 1607–1629.

J.P. ZOLÉSIO: Variational formulation for incompressible Euler flow/ shape-morphing metric and geodesic, 4B, 1631–1653.
