Control and Cybernetics

vol. **39** (2010) No. 4

Table of contents of volume 39 (2010)
AUTHOR, title, pages

Issue 1: Special Issue on Performance Evaluation Models of Manufacturing Systems. Guest Edited by: Zbigniew A. Banaszak and Oleg Zaikin

Guest Editorial, 5–8.

S. KLANCNIK, J. BALIC and F. CUS: Intelligent prediction of milling strategy using neural networks, 9–24.

V. T. TRAN and B.-S. YANG: Machine fault diagnosis and condition prognosis using classification and regression trees and neuro-fuzzy inference systems, 25–54.

I. ROJEK: Neural networks as performance improvement models in intelligent CAPP systems, 55–68.

I. BACH, G. BOCEWICZ, Z. A. BANASZAK and W. MUSZYŃSKI: Knowledge based and CP-driven approach applied to multi product small-size production flow, 69–95.

P. KORYTKOWSKI, T. WIŚNIEWSKI and O. ZAIKIN: Multi-criteria approach to comparison of inspection allocation for multi-product manufacturing systems in make-to-order sector, 97–116.

J. MATUSZEK and A. MOCZAŁA: The modelling and simulation method in computer aided cooperation, 117–131.

F. HNAIEN, A. DOLGUI and M.A. OULD-LOULY: Key performance indicators for supply planning of multilevel serial systems with stochastic lead times, 133–148.

E. NAWARECKI and J. KOŹLAK: Building multi-agent models applied to supply chain management, 149–176.

A. SMIRNOV, T. LEVASHOVA, N. SHILOV and A. KASHEVNIK: Knowledge sharing in flexible supply networks: a context-based approach, 177–196.

Ch. GERBER, I. IVANOVA-VASILEVA and H.-M. HANISCH: Formal modelling of IEC 61499 function blocks with integer-valued data types, 197–231.

M. B. ZAREMBA: Intelligence in manufacturing systems: the pattern recognition perspective, 233–258.

K. SANDKUHL: Capturing product development knowledge with task patterns: evaluation of economic effects, 259–273.

D. BAGLEE and M. KNOWLES: Maintenance strategy development within SMEs: the development of an integrated approach, 275–303.

N.N. BAKHTADZE, I.B. YADIKIN, V.V. KULBA, V.A. LOTOTSKY and E.M. MAXIMOV: An approach to coordination of power generating units, 305–318.

Issue 2: Special Issue on Intelligent Information Processing & Web Mining. Guest Edited by: Mieczysław A. Kłopotek, Adam Przepiórkowski and Sławomir T. Wierzchoń

Foreword, 323–324.

M. BERETA and T. BURCZYŃSKI: Evolving ensembles of linear classifiers by means of clonal selection algorithm, 325–342.

U. BORYCZKA: Ant colony metaphor in a new clustering algorithm, 343–358.

K. TROJANOWSKI: Multi-swarm that learns, 359–375.

K. CIESIELSKI, D. CZERSKI, M. DRAMIŃSKI, M. KŁOPOTEK and S. WIERZCHOŃ: Semantic information within the `BEATCA` framework, 377–399.

B. BRODA, M. PIASECKI and S. SZPAKOWICZ: Extraction of Polish noun senses from large corpora by means of clustering, 401–420.

P. HOMOLA and V. KUBOŇ: A method of hybrid MT for related languages, 421–438.

W. FROELICH and A. WAKULICZ-DEJA: Medical diagnosis support by the application of associational cognitive maps, 439–456.

A.A. TZACHEVA: Algorithm for generalization of action rules to summaries, 457–468.

J.W. GRZYMALA-BUSSE, W.J. GRZYMALA-BUSSE, Z.S. HIPPE and W. RZĄSA: An improved comparison of three rough set approaches to missing attribute values, 469–486.

K. GRUDZIŃSKI: Selection of prototypes with the E*k*P system, 487–503.

Regular Papers

A. ŽILINSKAS and J. ŽILINSKAS: On probabilistic bounds inspired by interval arithmetic, 507–525.

A.P. PIOTROWSKI and J.J. NAPIÓRKOWSKI: The grouping differential evolution algorithm for multi-dimensional optimization problems, 527–550.

S. BIAŁAS and M. BIAŁAS: Schur stability of the convex combination of complex polynomials, 551–558.

M. CHMIEL and E. HRYNKIEWICZ: Concurrent operation of processors in the bit-byte CPU of a PLC, 559–579.

Book review

M. Romaniuk: "Advances in Data Analysis" by C.H. Skiadas, 583–585.

Issue 3: With Special Section on Optimization with PDE Constraints. Guest Edited by: Jan Sokołowski and Antoni Żochowski

Special Section on Optimalization with PDE Constraints

Preface, 593–597.

J.S. JENSEN: Optimization of space-time material layout for 1D wave propagation with varying mass and stiffness parameters, 599–614.

B. MOHAMMADI: Hadamard incomplete sensitivity and shape optimization, 615–626.

A. MYŚLIŃSKI: Radial basis function level set method for structural optimization, 627–645.

H.J. PESCH, A. RUND, W. VON WAHL and S. WENDL: On some new phenomena in state-constrained optimal control if ODEs as well as PDEs are involved, 647–660.

E.W. SACHS and M. SCHU: Reduced order models in PIDE constrained optimization, 661–675.

S. SCHMIDT and V. SCHULZ: Shape derivatives for general objective functions and the incompressible Navier–Stokes equations, 677–713.

Regular Papers

R. GRIESSE, N. METLA and A. RÖSCH: Local quadratic convergence of SQP for elliptic optimal control problems with mixed control-state constraints, 717–738.

KIL TO CHONG, O. KOSTYUKOVA and M. KURDINA: Guaranteed control policy with arbitrary set of correction points for linear-quadratic system with delay, 739–768.

T. BANEK: Incremental value of information for discrete-time partially observed stochastic systems, 769–781.

T. KACZOREK: Stabilization of fractional positive continuous-time linear systems with delays in sectors of left half complex plane by state-feedbacks, 783-795.

J. DUDA: Lyapunov functional for a linear system with two delays, 797–809.

V.A. EMELICHEV, E.E. GUREVSKY and K.G. KUZMIN: On stability of some lexicographic integer optimization problem, 811–826.

M.E. De GIULI and G. GIORGI: A remark on sensitivity in linear programming and Gale-Samuelson nonsubstitution theorem, 827–838.

J.M. ALONSO-MEIJIDE, B. CASAS-MÉNDEZ, M.G. FIESTRAS-JANEIRO and M.J. HOLLER: Two variations of the Public Good Index for games with a priori unions, 839–855.

G. RZADKOWSKI and L.S. ZAREMBA: Shifts of the term structure of interest

rates against which a given portfolio is preimmunized, 857–865.

H. SONI, N.H. SHAH and Ch.K. JAGGI: Inventory models and trade credit: a review, 867–882.

Book reviews

A. Myśliński: "Numerical Solutions of Partial Differential Equations" by Silvia Bertoluzza, Silvia Falletta, Giovanni Ruso and Chi-Wang Shu, 885–587.

I. Pawłow: "Elliptic Equations: An Introductory Course" by M. Chipot, 889–890.

Issue 4: With Special Section on Soft Approaches to Information Processing. From Theory to Applications. Guest Edited by: S. Zadrożny, G. De Tré, E. Herrera-Viedma and G. Pasi

Guest Editorial: Soft approaches to information processing, 895–897.

C. PORCEL, J.M. MORALES DEL CASTILLO, M.J. COBO, A.A. RUÍZ and E. HERRERA-VIEDMA: An improved recommender system to avoid the persistent information overload in a university digital library, 899–923.

G. BORDOGNA and G. PSAILA: *Matrioshka*'s soft approaches to personalized web exploration, 925–957.

D. FURNO, V. LOIA and M. VENIERO: A fuzzy cognitive situation awareness for airport security, 959–982.

Y. QIANG, M. DELAFONTAINE, K. ASMUSSEN, B. STICHELBAUT, G. DE TRÉ, P. DE MAEYER and N. VAN DE WEGHE: Modelling imperfect time intervals in a two-dimensional space, 983–1009.

V. TORRA, G. NAVARRO-ARRIBAS and D. ABRIL: Supervised learning for record linkage through weighted means and OWA operators, 1011–1026.

Regular Papers

F.C. CHITTARO and G. STEFANI: Singular extremals in multi-input time-optimal problems: a sufficient condition, 1029–1068.

T.L. CHIEN, C.C. CHEN, Y.C. CHEN and S.L. WU: Improved fuzzy feedback linearization and Sinswat-transformation control of inverted pendulum, 1069–1093.

H. DU and N. ZHANG: Takagi-Sugeno fuzzy control scheme for electrohydraulic active suspensions, 1095–1115.

P. GAWKOWSKI, M. ŁAWRYŃCZUK, P. MARUSAK, J. SOSNOWSKI and P. TATJEWSKI: Fail-bounded implementations of the numerical model predictive control algorithms, 1117–1134.

J. WEREWKA and M. DACH: Response–time analysis of a CAN network used for supervisory control and diagnostic systems, 1135–1157.

M. BUSŁOWICZ: Simple conditions for robust stability of positive discrete-time linear systems with delays, 1159–1171.

J. DUDA: Lyapunov functional for a system with k-non-commensurate neutral time delays, 1173–1184.

S. EL OTMANI, G. RHIN and J.-M. ÉPÉE: The EM Algorithm applied to determining new limit points of Mahler measures, 1185–1192.

T. PRACZYK: Searching for optimal size neural networks in Assembler Encoding, 1193–1215.

Book review

A. Myśliński: "Global Pseudo-Differential Calculus on Euclidean Spaces" by F. Nicola and L. Rodino, 1219–1221.
