Control and Cybernetics
vol. **51** (2022) No. 4
pages: 327-341
DOI: 10.2478/candc-2022-0020

CONTENTS

Nazih Abderrazzak Gadhi and Aissam Ichatouhane: 425
Optimality conditions in set-valued optimization using approximations as generalized derivatives

Stepan A. Rogonov, Ilia S. Soldatenko and Alexander V. Yazenin: 445
On the quasi-efficient frontier of the set of optimal portfolios under hybrid uncertainty with short sales allowed

Przemysław Juszczuk and Lech Kruś: 467
Fuzzy trading system on the forex market for deriving the portfolio of instruments

Honorata Sosnowska: 487
Transformation into anti-manipulation method in voting. Changes in properties

Leszek Klukowski: 501
Estimating and testing relations and trees on the basis of pairwise comparisons

Radosław Marlęga and Jerzy R. Tchórzewski: 523
Hourly identification and simulation of the TGE S.A. Day-Ahead Market system

Dariusz Ruciński: 557
Neural modelling of prices on the Day-Ahead Market at the Polish Power Exchange supported by an evolutionary algorithm and inspired by quantum computing
