

Table of content -- C&C 3/2021

Daniel Luft and Volker Schulz: *Pre-shape calculus: foundations and application to mesh quality optimization*

Zohreh Hayati, Mohsen Shafieirad, Iman Zamani, Amir Hossein Amiri Mehra and Zohreh Abbasi: *Parameter estimation of MIMO two-dimensional ARMAX model based on the IGLS method*

Antonina Krajewska: *Learning causal theories with non-reversible MCMC methods*

Fatemeh Babakordi and N. A. Taghi-Nezhad: *Introducing hesitant fuzzy equations and determining market equilibrium price*

Jerzy Tchórzewski and Dariusz Ruciński: *Quantum-inspired method of modeling the neuronal day-ahead market of the Polish electricity exchange*

Jaakko Hakula: *Voting and MCDM: the pedagogy of the Saari triangle*

Jan W. Owsiniński: *On the use of data analysis and OR modelling in MCDM problems: a case analysis – a rejoinder to the paper by Sousa Ribeiro et al.*
