

Table of content of volume 51 (2022)
AUTHOR(S), title, initial page number

Issue 1:

- VLADIMIR EMELICHEV AND YURY NIKULIN: Stability kernel in finite games with perturbed payoffs, 5
- PATRICK FLORCHINGER: A Jurdjevic-Quinn theorem for stochastic differential systems under weak conditions, 21
- MARIO ABUNDO: Some examples of solutions to an inverse problem for the first-passage place of a jump-diffusion process, 31
- KOUSHIK DAS: Set-valued minimax fractional programming problems under ρ -cone arcwise connectedness, 43
- NAVDEEP KAILEY, SONALI SETHI AND SHIVANI SAINI: Sufficient optimality condition and duality of nondifferentiable minimax ratio constraint problems under (p, r) - ρ - (η, θ) -invexity, 71
- AMRITA BHADORIYA, MRUDUL Y. JANI, URMILA CHAUDHARI AND ANIKET C. TADVI: A new approach to maximize the overall return on investment with price and stock dependent demand under the nonlinear holding cost, 91

Issue 2:

- PREFACE FROM THE EDITORS, 113
- ZBIGNIEW NAHORSKI AND JAN W. OWSIŃSKI: 50 years of history, the present and the future, 115
- GIANFRANCO GAMBARELLI: Throwback, 125
- JOSÉ LUIS VERDEGAY: "Cum grano salis", 131
- HANNU NURMI: Social choice, stable outcomes and deliberative democracy, 137
- NIKOLAI P. OSMOLOVSKII: A second-order sufficient condition for a weak local minimum in an optimal control problem with an inequality control constraint, 151

- IRENA LASIECKA AND ROBERTO TRIGGIANI: Uniqueness of the Riccati operator of the non-standard ARE of a third order dynamics with boundary control, 171
- VAIBHAV MEHANDIRATTA, MANI MEHRA AND GÜNTER LEUGERING: Distributed optimal control problems driven by space-time fractional parabolic equations, 191
- GÜNTER LEUGERING, ANTONIO ANDRÉ NOVOTNY AND JAN SOKOŁOWSKI: On the robustness of the topological derivative for Helmholtz problems and applications, 227
- EULALIA SZMIDT, JANUSZ KACPRZYK AND PAWEŁ BUJNOWSKI: Similarity measures for Atanassov's intuitionistic fuzzy sets: some dilemmas and challenges, 249
- JANUSZ KACPRZYK AND SŁAWOMIR ZADROŻNY: A novel approach to hierarchical contextual bipolar queries: a winnow operator approach, 267

Issue 3:

- NAZIH ABDERRAZZAK GADHI AND MOHAMED OHDA: Necessary optimality conditions for robust nonsmooth multiobjective optimization problems, 289
- HOCINE MOKHTAR-KHARROUBI: Characterizations and classification of paraconvex multimaps, 303
- GIORGIO GIORGI: Necessary and sufficient conditions for constant prices in a Sraffa's model, 327
- SERGEY DVOENKO: Clustering of data represented by pairwise comparisons, 343
- ROSANA CARMEN DE MEIROZ GRILLO GONCALVES AND JOSHUA ONOME IMONIANA: Readiness of low complexity ERP for continuous auditing in SMEs: the Brazilian case study, 389

Issue 4:

- NAZIH ABDERRAZZAK GADHI AND AISSAM ICHATOUHANE: Optimality conditions in set-valued optimization using approximations as generalized derivatives, 425
- STEPAN A. ROGOV, ILIA S. SOLDATENKO AND ALEXANDER V. YAZENIN: On the quasi-efficient frontier of the set of optimal portfolios under hybrid uncertainty with short sales allowed, 445
- PRZEMYSŁAW JUSZCZUK AND LECH KRUSÍ: Fuzzy trading system on the forex market for deriving the portfolio of instruments, 467
- HONORATA SOSNOWSKA: Transformation into anti-manipulation method in voting. Changes in properties, 487
- LESZEK KLUKOWSKI: Estimating and testing relations and trees on the basis of pairwise comparisons, 501

RADOSŁAW MARŁĘGA AND JERZY R. TCHÓRZEWSKI: Hourly identification and simulation of the TGE S.A. Day-Ahead Market system, 523

DARIUSZ RUCIŃSKI: Neural modelling of prices on the Day-Ahead Market at the Polish Power Exchange supported by an evolutionary algorithm and inspired by quantum computing, 557
