WARSZAWA • 2006 • QUARTERLY • VOL. 35 • No. 4

This journal is edited and published by the Systems Research Institute of the Polish Academy of Sciences. Its main objective is to stimulate the development of broadly conceived systems theory and analysis.

The field of interest covers general concepts, theories, methods and techniques associated with analysis, modelling, control and management in various systems (e.g. technological, economic, ecological, social).

The journal is particularly interested in results in the following areas of research:

#### **Systems and control theory**

- General systems theory
- Optimal control
- Optimization theory
- Optimization algorithms
- Decomposition and coordination methods
- Structural optimization
- Data analysis and learning
- Modelling and identification
- Game theory and polioptimization
- Decision and negotiation systems
- Stochastic and fuzzy systems

#### **Systems control and management**

- Systems analysis of national and regional development
- Modelling and control of complex systems (in energy, water, industry, agriculture)
- Applications of operations research methods
- Computer aided management, control and optimal design
- Methodological aspects of applications of control and systems methods

Quarterly journal CONTROL AND CYBERNETICS is being indexed in the following ISI<sup>®</sup> products: *SciSearch*<sup>®</sup>, *Research Alert*<sup>®</sup>, *CompuMath Citation Index*<sup>®</sup>, and *Current Contents*<sup>®</sup>/*Engineering, Computing & Technology*. Reviews of individual papers from CONTROL AND CYBERNETICS appear also in *International Abstracts in Operations Research*, *Mathematical Reviews* and *Zentralblatt für Mathematik*. Abstracted in *Applied Mechanical Reviews*.

We hope that CONTROL AND CYBERNETICS will contribute to the development of systems and control sciences and will stimulate and encourage applications of systems approach in different areas.

vol. **35** (2006) No. 4

## PREFACE

The present volume, being a special issue of the journal *Control & Cybernetics*, contains selected articles based on the talks given at Fourth Junior European Meeting on “Control and Optimization”, which was held at the Białystok Technical University in Białystok, Poland, on 11-14 September 2005.

The Meeting was organized by the Institute of Mathematics and Physics of the Białystok Technical University and by the Foundation for Development of the Białystok Technical University (*Fundacja na Rzecz Rozwoju Politechniki Białostockiej*), and was sponsored by the Ministry of National Education and Sport of Republic of Poland, this sponsorship, extending also to the publication of the present volume, being gratefully acknowledged.

The articles herein provide new developments in several areas related to control and optimization, in particular: optimal control, systems on time scales, viability of differential inclusions, differential games, infinite dimensional and delay systems, state estimation, vector optimization, singularities and realizations of control systems, stabilization and observers. The authors are mostly young researchers from several countries of the European Union. All papers included in this volume have passed the standard refereeing process.

Guest Editors

Zbigniew Bartosiewicz

Ewa Girejko

CONTENTS

---

Preface	765
Z. BARTOSIEWICZ, E. PAWLUSZEWICZ: Realizations of linear control systems on time scales	769
P. BETTIOL: A deterministic approach to the Skorokhod problem	787
A.L. DAWIDOWICZ, A. POSKROBKO: On asymptotic behaviour of the dynamical systems generated by von Foerster-Lasota equations	803
E. GIREJKO, Z. BARTOSIEWICZ: Viability and generalized differential quotients	815
P.D.F. GOUVEIA, D.F.M. TORRES, E.A.M. ROCHA: Symbolic computation of variational symmetries in optimal control	831
D. JANCZAK, Y. GRISHIN: State estimation of linear dynamic system with unknown input and uncertain observation using dynamic programming	851
J. JORDAN: Discrete-time control systems on homogeneous spaces: partition property	863
A.B. MALINOWSKA: Nonessential objective functions in linear multiobjective optimiza- tion problems	873
C.S. MOREIRA: Singularities of the stationary domain for polydynamical systems	881

---

D. MOZYRSKA, Z. BARTOSIEWICZ: Dualities for linear control differential systems with infinite matrices	887
T. MULLARI, Ü. KOTTA, S. NÖMM, M. TÕNSO: Realization of nonlinear composite systems	905
Ch. PRIEUR, E. TRÉLAT: Hybrid robust stabilization in the Martinet case	923
E.A.M. ROCHA, D.F.M. TORRES: Quadratures of Pontryagin extremals for optimal control problems	947
C.J. SILVA, D.F.M. TORRES: Two-dimensional Newton's problem of minimal resistance	965
M. WYRWAS: Multiobservers and their application to output stabilization	977
Z. ZACZKIEWICZ, V. MARCHENKO: Observability of small solutions of linear differential-algebraic systems with delays	997
Table of contents of volume 35 (2006)	1015
Alphabetical list of contributors of volume 35 (2006)	1019
The list of volume's referees	1023
