

Control and Cybernetics

vol. 48 (2019) No. 2

CONTENTS

SPECIAL ISSUES TO HONOUR GÜNTER LEUGERING ON HIS 65 th BIRTHDAY, PART 2	203
FROM THE EDITORIAL OFFICE	205
CONTENT OF THE SPECIAL ISSUES	207
FALK M. HANTE AND MARTIN SCHMIDT: Convergence of finite-dimensional approximations for mixed-integer optimization with differential equations	209
DEBAYAN MAITY, MARIUS TUCSNAK AND ENRIQUE ZUAZUA: Controllability of a class of infinite dimensional systems with age structure	231
PHILIPP JARDE AND MICHAEL ULBRICH: Existence of minimizers for optical flow based optimal control problems under mild regularity assumptions	261
MARCEL DUARTE DA SILVA XAVIER, ANTONIO ANDRÉ NOVOTNY AND JAN SOKOŁOWSKI: Growth control of cracks under contact conditions based on topo- logical derivative of the Rice's integral	307
AHMAD AHMAD ALI, KLAUS DECKELNICK AND MICHAEL HINZE: Sufficient conditions for unique global solutions in optimal control of semilinear equations with C^1 nonlinearity	325

PALOMA SCHÄFER AGUILAR, JOHANN MICHAEL SCHMITT, STEFAN ULBRICH AND MICHAEL MOOS: On the numerical discretization of optimal control problems for conservation laws	345
SOHEIL HAJIAN, MICHAEL HINTERMÜLLER, CLAUDIA SCHILLINGS AND NIKOLAI STROGIES: A Bayesian approach to parameter identification in gas networks	377
