

Control and Cybernetics

vol. 48 (2019) No. 3

CONTENTS

MARIO LEFEBVRE:	407
Minimizing the time spent in an interval by a Wiener process with uniform jumps	
MAHAMADI WARMA AND SEBASTIAN ZAMORANO:	417
Null controllability from the exterior of a one-dimensional nonlocal heat equation	
NAZIH ABDERRAZZAK GADHI, FATIMA ZAHRA RAHOU AND MOHAMMED EL IDRISSI:	439
Optimality conditions for a set-valued optimization problem in terms of approximations	
AREF SHAHMANSOORIAN:	453
The relation between four input-four output transfer function matrix entries and the RGA entries	
VALERIE FLAMMANG AND JEAN-MARC SAC-ÉPÉE:	463
Totally positive polynomials with small length	
MONOJIT DAS AND SUDIPTA SINHA:	473
A variant of the Narayana coding scheme
