

Control and Cybernetics

vol. **48** (2019) No. 2

From the Editorial Office

This issue of Control & Cybernetics constitutes Part 2 of the set of papers, dedicated to Günter Leugering on the occasion of his 65th birthday. For the sake of information completeness, we provide here the entire table of contents of the two parts, i.e. issue 1/2019 and the present issue 2/2019. The order of the sequence of papers, appearing in both issues, is the straightforward consequence of that order, in which they were sent in and then accepted for publishing.

While repeating our best wishes for Professor Günter Leugering, we would also like to thank the Guest Editors of this two-part work, and all the authors, who contributed to it.
