Publication and Copyright Conditions: *Control & Cybernetics*

1. Journal *Control & Cybernetics* publishes papers that have not been published before and have not been submitted before or in parallel elsewhere. Authors submitting to the Journal *Control & Cybernetics* ("Journal" henceforth) take the obligation of acting in conformity with this condition. In case it is established that an essentially identical paper has been published before elsewhere or submitted in parallel elsewhere, the respective authors may be forbidden to publish with the Journal for the period of five years starting with the date of submission.
2. The authors retain the intellectual property rights associated with the paper published in the Journal, but all the respective material rights pass on to the Publisher of the Journal, that is: the Systems Research Institute, Polish Academy of Sciences, Newelska 6, 01-447 Warszawa, Poland.
3. The above includes the right of the Publisher to publish and disseminate the paper in any form available at the date the present document is signed or in the future, with full acknowledgement of the authorship and integrity of the work, represented by the paper.
4. In particular, the Publisher may, in order to assure the widest possible audience for the work published in the Journal, make the work included in the databases serving the purpose of worldwide dissemination. Likewise, the Publisher shall make the appropriate information on the work available to abstracting, indexing and archiving services of its choice.
5. In specific cases, and upon explicit request from the authors, the above point may be made void, or the scope of making the paper available to the disseminating services made explicit through a separate agreement.
6. In case the authors have made the text of the paper public in any way prior to submission to the Journal, without contravening the conditions of point 1 above, like by making it available through a website, and appropriately notifying the Editors of the fact, at the instance of publication with the Journal this way of making the work public ought to be fully replaced by the pdf copy of the paper as published in the Journal. The same applies to own archiving and homepage posting of the work after the publication in the Journal. Free access to these, as well as downloading possibility are subject to a separate agreement with the Journal.
7. The submitted papers are subject to the peer review procedure, in which they are evaluated by anonymous independent reviewers. It is assumed that two reviews be prepared per paper. On the basis of reviews decisions are made by the Editors, along with potential indications as to required modifications of the paper reviewed. The final decisions on publication or rejection are also made by the Editors on the basis of reviews obtained.
8. The typeset papers are sent to the authors for correction ("galley proofs"). If the modifications introduced by the authors, not resulting from mistakes or errors on the side of typesetting, exceed 4% of the paper volume, the paper may be delayed to another issue available or the authors might be charged for extra work of typesetting, as agreed.
9. The authors obtain one copy of the issue, in which the paper appeared, free of charge. Any additional copies of the issue, when ordered at the stage of proofreading (see above), can be purchased at special Author's price from the Publisher.
